Dear Sir:

My reference is to "Essays on Science", Felicitation Volume in Honour of Dr. Joseph Needham; and specifically to pages 154 - 180, "Production Management in Japan Before the Period of High Economic Growth" authored by Tetsuro Nakaoka.

I make so bold as to ask a favor of you. I would like to get in touch with Tetsuro Nakaoka. Can you provide me with his mailing address?

His paper is one of the most complete and honest discussions of the subject I have seen since the end of World War II. I should know. I was the Principal Officer in the Civil Communications Section of the General Headquarters of the Allied Forces in Japan who carried forth the effort Nakaoka describes in pages 165 - 169 of this paper!

I would like to follow up with him a further discussion on Japan's progress since 1950 in the area of Total Quality Management, and the influence of the Japanese government's national industrial policy.

I am most grateful for any help you may be able to provide.

Sincerely,
